that gives
more.

## Complete Care built around you

### The Everside difference

#### We support the primary care provider

- 99% of providers improved satisfaction<sup>1</sup>
- 97% of providers improved provider–patient relationships<sup>1</sup>

#### We focus on patient experience

- 85 Net Promoter Score<sup>2</sup>
- 96% of patients who responded to our survey were satisfied with the level of trust they have with their Everside provider<sup>2</sup>

## We integrate care & reduce costs for patients

- Annual cost trend of 1.1% vs. industry average of 6-7%<sup>3</sup>
- Millions of dollars in patient copay / deductible savings through our platform

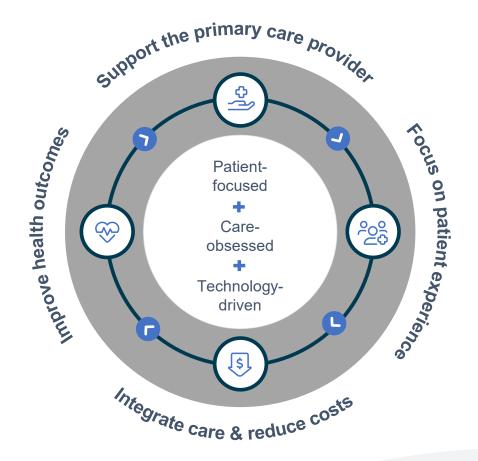

#### We improve health outcomes

- 76% of uncontrolled diabetic patients experiencing a reduction in A1C<sup>4</sup>
- **76**% of high cholesterol patients experiencing a reduction in cholesterol levels<sup>5</sup>

#### Note:

- 1. Per Milliman survey of 200 DPC physicians
- 2. Per internal Everside surve
- 3 Everside internal analysis looking at performance of 80 clients and 170 000 lives against average 6.5% trend
- 4. Among diabetes patients with hemoglobin A1C greater than 8 based on internal analysis of Everside clinical data
- 5. For patients with high cholesterol levels over 240 based on internal analysis of Everside clinical database

# Traditional primary care is incomplete

Mental health services are key to treating the complete person

#### The link between mental and physical health

Depression has been linked to many chronic illnesses—including diabetes, asthma, cancer, cardiovascular disease, and arthritis

The mortality rate from cancer and heart disease is higher among people with depression or other mental health conditions

The cost of care is 75% higher for people with cooccurring mental and physical health issues than those without a behavioral health issue

About 1 in 4 US adults will suffer from a diagnosable mental disorder each year

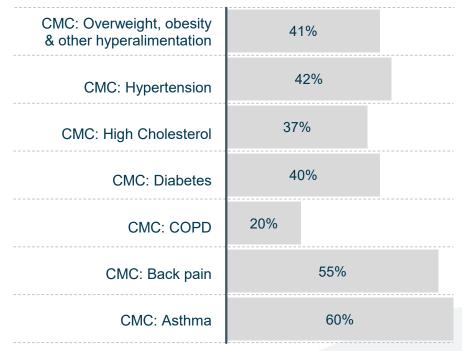

# When a mental health condition is present, chronic conditions get worse

## Manageable Chronic Condition PMPM (Mental Health vs Non)

CMC: Overweight, obesity & other hyperalimentation		\$596	\$840	
CMC: Hypertension		\$578	\$824	
CMC: High Cholesterol		\$537	\$739	
CMC: Diabetes		\$803	\$1,128	
CMC: COPD	\$1,118		\$1,339	
CMC: Back pain		\$549	\$851	
CMC: Asthma		\$562	\$899	
MC: Major depressive disorder or unspecified mood disorder		\$0	\$660	
MC: Anxiety, dissociative, stress-related, somatoform disorder		\$0	\$573	

## Cost Difference PMPM (Mental Health vs Non)

# Redefining primary care to be truly holistic
